Please add the following claim:

*Sub BS*  
*Q1*

--58. A gravity-sensitive latch comprising:

- a housing;
- a button or handle secured to said housing;
- a pendulum operatively in communication with said button or handle, said pendulum pivoting between a latched position and an unlatched position; and
- a pawl pivotally secured to said housing, said pawl being dimensioned and configured to engage a keeper, said pawl pivoting between a latched position and an unlatched position.--
